INTRODUCTION

The IEEE GLOBECOM 2014 Conference is one of the IEEE Communications Society's two flagship conferences. Each year, over 3,000 scientific researchers and their management submit proposals for program sessions to be held at a GLOBECOM Conference. After extensive peer review, the best of the proposals are selected for the conference program, which includes technical papers, tutorials, workshops and industry sessions.

Major components of the conference program include: keynote speakers (representing the elite of the Communications industry), technical papers sessions, workshops, tutorials, an award's luncheon and a world class banquet with entertainment. IEEE GLOBECOM 2014 will also place major emphasis on the real-world interests of industry practitioners.

It is with great pleasure that the Austin technical and business community was chosen to host this prestigious Conference.

In addition to the program shown below, there will be special industry events and opportunities to meet and recruit young engineers. This will include a GOLD (IEEE Graduates of the Last Decade) Session, and other professional and career events which will be publicized in the Advance Program.
